EDUCATION

National University of Technology (NUTECH)

Bachelor of Science in Software Engineering

Islamabad, Pakistan

Sep 2023 -- Jun 2027

- Relevant Coursework: Data Structures & Algorithms, OOP, Database Management, Web Technologies, Artificial Intelligence, Computer Networks, Software Architecture, Software Quality Engineering, Software Construction & Development, Software Validation & Verification
- Active this semester: Software Project Management, Web Engineering, Parallel & Distributed Computing, Data Science, Advanced DBMS
- Student Council: Management Team Member, NUTECH Punjab Student Council -- coordinated 5+ university events, improving attendance by ~20%

Govt. Model Science College

FSc Pre-Engineering

Muzaffarabad, Pakistan

2020 -- 2022

EXPERIENCE

Frontend Web Developer

Siber Koza Alpha | NASTP Rawalpindi

Jul 2025 -- Sep 2025

Rawalpindi, Pakistan

- Build 3 web practice projects (e-commerce product page, analytics dashboard, task manager) inside a professional software team at the National Aerospace Science and Technology Park (NASTP)
- Built a data analytics dashboard using vanilla JavaScript and the HTML5 Canvas API for all chart rendering -- zero external libraries -- demonstrating core DOM and JS proficiency
- Implemented fully responsive, cross-browser-compatible layouts using HTML5, CSS3 (Flexbox/Grid) and mobile-first design across all deliverables
- Improved team workflow efficiency by 40% through adoption of CLI-based tooling and structured Git version-control practices
- Operated in a real delivery environment with deadlines and professional team collaboration -- not a classroom setting

Management Team Member (Volunteer)

NUTECH Punjab Student Council

Sep 2024 -- Present

Islamabad, Pakistan

- Planned and executed 5+ university-wide events coordinating a 10-member team across logistics, scheduling, and digital promotion
- Delivered technical workshops on schedule, demonstrating resource planning and execution under time pressure

PROJECTS

RouteMate | PostgreSQL, Express.js, React.js, Node.js, PostGIS, JWT, Leaflet.js 2025 -- Present

- Designed and built a multi-tenant carpooling platform for Pakistani university students -- separate admin dashboard per institution with role-based access for students, drivers, and admins
- Implemented geospatial ride-matching using PostGIS ST_DWithin queries to find drivers within a configurable radius of a student pickup point
- Built full authentication flow: JWT tokens, bcrypt password hashing, protected routes, and session management
- Core ride-posting and ride-finding flows functional; payment integration and real-time chat planned for v2

Food Recommendation System | Python, scikit-learn, pandas, SQL

Jan 2025

- Implemented collaborative filtering from scratch using scikit-learn, achieving 85% recommendation accuracy across 50+ test user profiles
- Built end-to-end pipeline: data collection, normalisation, missing-value handling, model training, and prediction output
- Designed SQL schema to persist user profiles and interaction history, enabling model retraining on new data

Music Recommendation System | Python, SQL, Spotify Web API

Dec 2024

- Integrated Spotify Web API to ingest real audio features (tempo, energy, danceability, valence) as model training data
- Built preprocessing pipeline transforming raw API responses into model-ready feature matrices

- Designed normalised database schema for listening history, song metadata, and feature vectors -- optimised for 1,000+ records

Property Rental Web Application | Python, Django, MySQL, HTML/CSS/JS Jan 2024 -- May 2024

- Built a full-stack MVC web application enabling users to browse, filter, and list rental properties
- Implemented Django user authentication, session management, and role-based views for landlords and tenants

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++, HTML5, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Django, TailwindCSS, scikit-learn, pandas, NumPy

Databases: PostgreSQL (incl. PostGIS), MySQL, SQL Server, Supabase, Firebase

Developer Tools: Git, GitHub, VS Code, Postman, Jira, Figma, Linux CLI, Cursor, Claude, Antigravity, Stitch

AI / ML: Prompt Engineering

QA / Testing: Black-Box Testing, Equivalence Partitioning, Requirements Traceability Matrix (RTM), Static Analysis, V&V Lifecycle

CERTIFICATIONS

- Introduction to Generative AI -- Google (Jan 2026)
- Google Cloud: Prompt Engineering Guide -- Google (Jan 2026)
- Prompt Engineering for Everyone -- IBM Developer Skills Network (2024)
- AWS Cloud Technical Essentials -- Amazon Web Services via Coursera (2025)
- Agile Project Management with Jira -- Coursera (Jun 2025, 100% score)
- Foundations of Data Analytics -- Google via Coursera (Dec 2025)
